

# Photography Assignment

## Urban Alphabet

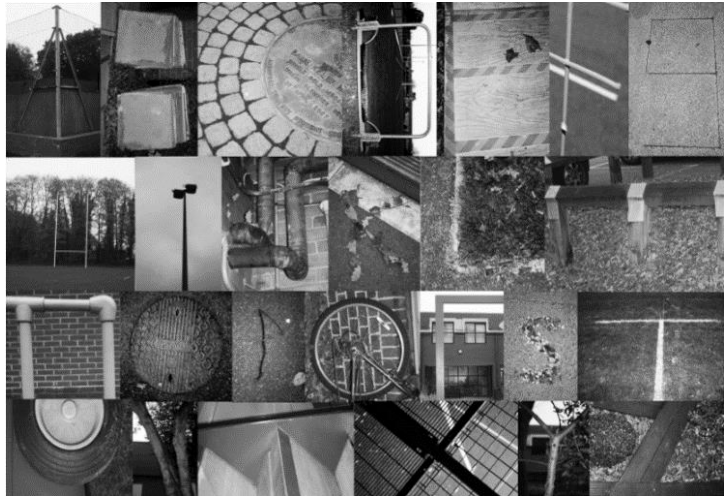

### Your Task

What is an Urban Alphabet?

Find examples using the Internet.

How are they created?

Present your research in a Power Point.

Create your own Urban Alphabet with shapes that you find in your immediate environment.

Look for shapes of letters in fences, cracks in walls, pipes, parts of cars/bikes etc.

For this you will need a camera. It does not need to be an SLR Camera, even a phone will do as long as you consider the following:

- Framing of the shapes you find through the view finder on your camera
- Cropping afterwards (could be done in Word if you do not have access to a photo editing suite such as Photoshop)
- Pay particular attention to the composition of your photos.

The final result should be presented as a booklet. Consider how it will be put together. It could be a concertina, ring bound, stapled etc.
